

Nepal Info from marshyangdi school

Dear Andrea Berner and friends,,,,,

Namaste...

With all our love, thoughts and prayers...

We are very sure that you along with your family and friends are in sound health, in good spirit and doing fine at your home. We are immensely very sad and shocking with the continuous news of casualties in many countries specially in Europe and America. Our heartiest prayers, thoughts and love are all with you... We pray for your good health and well being all the time...

Here in Nepal we are still under ?partial LOCKDOWN?. No public transportation, no social/religious gatherings, No air transportation, No schools/colleges/institutions, No health clubs/cinemas and so on...Only groceries, small shops, private vehicles, ration shops and so on are opening.

Now the COVID-19 is spreading in large numbers then early days. Every day there are more than hundreds new cases coming but now the good news is that the number has come down very low. Before there used to be six to seven hundreds new cases. Till today there are 38 dead in Nepal, above 16,800 positive infected cases and thousands and thousands in quarantine. During the month of June, 2020 the number has increased unbelievably. It's very difficult time going as we don't have good health care facilities and human resources to tackle it. In Kathmandu itself there are hundreds of positive cases these days. In India there are more than 800,000 positive cases (third highest in the world) and over 20,000 dead (till today). It's really alarming and serious for Nepal as we have very open and long long border with India.

Our kids are all in their mountain villages and came to know that they are all doing well and fine with their family. We have started ?ONLINE CLASSES? since last three weeks to engage our kids with the regulars studies for two and half hours a day. Kids are enjoying it and many are trying to come online. We are trying to engage as much as more kids. It's little difficult for the kids in high Himalaya and remote hilly regions. The Nepalese Government has also started TV, Radio and online classes for all the kids in Nepal for the certain limited time.

We admire and appreciate all your wonderful love, support and inspiration for our kid. Please,,, be safe and stay strong with all our appreciation, love, prayers

and thoughts....
