

Greetings from Maya's School

Dear Andrea Berner, Namaste....

Hope this mail will find you in the best of your health. We all along with Maya Tamang are in good health and doing well with our daily school activities. Attached here with the progress report of first terminal exam of this session. Hope you will be happy with the report and the good progress of your ward. As the government has changed the educational system of Nepal we are now publishing the result with grading system like foreign countries. It's with (GPA) Grade Point Average and (AG) Average Grade. It's a new practice and going good with enthusiasm and excitement. She has secured B+ grade which is a very good one. Congrats....

We are happy with the hard work, interest and effort put in by Maya through out the school days. We are also happy with her participation in different extra activities which will enhance her hidden talents and general academic progress for the all round development. It's all possible by your love and support for her. Thanks a lot...

It's summer days in Nepal with lots of rain !! We had two phases of local level election in six federal States. Now there is one federal State left to conduct local level election. We hope it will conduct within two months of time and after that we will go for province legislative election followed by people's representative in Central Parliament. We hope to have stable Government there after to run the country towards prosperous Nepal with New Constitution. We pray for smooth execution of all these new beginnings for better and prosperous Nepal. Lets HOPE..

With warmest greeting and love to you.....
